Subject: Objection to Eversource's Petition for Reconsideration of Greenwich Substation

Dear Siting Council: I vehemently object to the petition by Eversource for reconsideration of building its substation where it was denied by the Siting Council in May of 2016. There have been no positive changes to this community, which would enable Eversource to barrel in and endanger our lives, businesses, wildlife, or property values in one year. I find this behavior bullying and unnecessary.

Are we to live on tenterhooks constantly fearing this huge utility threatening our very lives persistently? During the entire review process, we, the people of Greenwich, found not only compelling and legitimate reasons to deny this action, but we also pointed out several viable alternatives for Eversource to consider before putting people's lives in danger, destroying the aesthetic of Connecticut's gateway town to the West, and devaluing property as well as disrupting viable small community serving and supportive businesses. I am offended and astounded by this reconsideration proposal. Does CT truly want to make CT even more unattractive for young families and small businesses?

Putting any reconsideration into this project would do just that....and due to this nightmare, I am actually looking towards other states now for relief from all the CT taxes, and before I consider any area, I have been asking if there are any potential challenges to the community by threats from large corporate or utilities, as I will not buy property anywhere near a substation. I implore to council to dismiss this petition with dispatch! I also am uninterested in manning a whole protest movement again for this, and I fear others will feel the same as we took substantial time out of our lives to fight with this company. Is this its strategy? To wear us down by constantly re-petitioning year after year until we are too tired to fight and just hand over our town?

Sorry, enough it enough!!! We fought this with zeal because we are passionate about our town. We are getting so little support from government these days in so many ways here, please do not contribute to that sense. Deny this petition.

Thank you for your attention, time, and I hope sincere consideration.
